

Project Design Phase-3

Data flow diagram and User Stories

Project Name: Diabetes Prediction Using ML

Maximum Marks: 4

The data flow Diagram for the project is:

User stories:

S.No	User Type	User Story	Acceptance criteria	Priority	Release	Functional Requirement
1	Doctor(Web)	He should be able to create account using the contact information	To see health information after logging in	High	Sprint-1	Registration
2	Patient(web)	Logging in using credentials	To access the information uploaded	High	Sprint-1	Logging in
3	Admin	Power to merge accounts by adding, modifying accounts	To maintain data integrity	High	Sprint-1	User management
4	Admin	Only authorized ones can change data	To restrict sensitive data to everyone	High	sprint-1	security
5	Patient	Good user interface	Easy accessibility	Medium	Sprint-2	Experience
6	Doctor	View patient data	Data is needed for diagnosis	High	Sprint-1	Prescribing
